### NOTES FROM THE VINEYARD

The 2018 vintage was a mild growing season, with temperatures consistently lower than usual throughout spring and summer. Due to the agreeable weather, harvest featured dramatically longer ripening and picking windows. Grapes were harvested up to three weeks later than usual and without any pressure from extreme heat spells. Napa and Sonoma Counties experienced the late summer and early fall weather that has made them world-renowned winegrowing regions: cooler, fog-laden mornings that develop into sunny and warm afternoons. Additionally, the climate variation between our Napa Valley and Russian River Valley estate properties gives us a layered Sauvignon Blanc.
